

**Supplying Artwork**

We can only accept artwork provided in high-resolution PDF (preferred), TIFF or JPG formats. Please see below for specification details, and for help creating suitable PDFs.

**Paper Sizes**

Please check that your artwork size matches the correct page size (shown below):

Size	Dimensions
A0	841 x 1189mm
A1	841 x 594mm
A2	420 x 594mm
A3	420 x 297mm
A4	210 x 297mm
A5	148.5 x 210mm
A6	148.5 x 105mm
SRA1	900 x 640mm
SRA2	450 x 640mm
SRA3	450 x 320mm
DL	210 x 99mm
Pullup Banner	850 x 2000mm

\* Artwork will require 3mm bleed on each edge

**Artwork Specifications**

Images must be 300dpi to ensure quality reproduction. All fonts must be embedded or converted to outlines. Any transparency must be flattened CMYK colour - do not include spot/special colours or RGB. 3mm bleed and crop marks (in Registration) are preferable on full-page artwork. Minimum stroke widths should not fall below 0.25pt. In the instance where multiple page files (such as multiple-page ads, cover wraps etc.) are to be supplied, these must be supplied as separate PDF files, making clear the order in which they should appear. In the event that the ads are to be run in sequence, it is essential that the correct sequence is made clear.

**Supply of Logos**

Please supply logos as high resolution or scalable vector files wherever possible, to ensure the best print reproduction.

**TIFFs and JPGs**

TIFF files must be supplied at 300dpi resolution and without compression JPG files must be supplied at 300dpi resolution.

**PDF Settings**

In order to maintain quality and reliability of files, we require PDFs to conform to the PDF/X-1a settings (with high-res transparency flattening). We recommend you use the latest industry-standard production settings when producing your PDF artwork.
